SUBJECT INDEX, VOLUME 20

A

PAGE

Absorption and translocation, bioxone in cotton ... 116
Absorption and translocation, 2,4-DB in soybean and cocklebur ... 120
Absorption and translocation of trifluralin and methazole in peanuts, temperature effects on ... 285
Absorption of herbicides by soybean seeds, influence on emergence and seedling growth ... 506
Accumulation and transport of 2,4-D, lipid influence on ... 46
Achenes of Scotch thistle, germination and persistence ... 98
Activated carbon, factors to improve herbicide selectivity ... 180
Activity, of atrazine and ametryne ... 274
Activity of terbutryn, edaphic factors affecting ... 28
Adsorption and desorption, of picloram, trifluralin and paraquat by exchange resins ... 250
After-ripening, anatomy of wild garlic bulbs during and subsequent to ... 233
Alfalfa and medium red clover, bromoxynil, chloroxynil, and 2,4-DB for establishing ... 140
Alfalfa and subsequent crops, effect of herbicides on ... 335
Algae, sources of CO^2 for nuisance blooms of ... 492
Ametryne and atrazine, growth regulator-like activity of ... 274
Anatomy and carbohydrate reserves in mugwort rhizomes, influence of fenac on ... 445
Anatomy of roots of cabbage and tomato, effects of weeds on ... 33
Anatomy, of wild garlic bulbs during and subsequent to after-ripening ... 233
Annual applications of herbicides in red raspberry plants, effect of ... 432
Annual bluegrass in turf, role of endothall in control of ... 562
Annual rangeland weeds, microsite requirements for establishment ... 350
Antagonism of EPTC and 2,4-D, RNA synthesis as the basis for ... 8
Antagonistic effects, between picloram and bromacil with oats ... 440
Antibiotic effects, of plants in laboratory and field ... 189
Application, low-volume preemergence herbicides ... 176
Application time of diphenamid, effect on pepper, weeds, and disease ... 468
Applications of preplant atrazine, on sorghum ... 49
Aquatic plants, water, and bottom sediment, effects of fertilization on ... 482
Aquatic weed control, with white amur ... 106
Asparagus, effects of continued use of herbicides in ... 428
Atrazine and ametryne, growth regulator-like activity of ... 274
Atrazine and propazine, low-volume application to sorghum ... 12
Atrazine and simazine, metabolism by wild cane ... 153
Atrazine, effect on chlorophyll retention in corn leaf discs ... 86
Atrazine, effect on chromatin activity in corn and soybean ... 367
Atrazine, foliarly-applied, uptake and translocation of ... 36
Atrazine in three Oregon soils, biological and chemical degradation of ... 344
Atrazine, preplant applications on sorghum ... 49
Auxin-like herbicides, nucleic acid and protein changes induced by ... 53

B

Banded or broadcast chloramben, and tillage variables in soybeans ... 502
Barban, differential response of wild oat and barley to ... 74
Barley and flax, trifluralin for green foxtail control in ... 160
Barley and wild oat, differential response to barban ... 74
Bean, interaction of prometryne and phorate on ... 89
Bentgrass, phytotoxicity of herbicides to ... 387
Biological and chemical degradation, of atrazine in three Oregon soils ... 344
Bioxone in cotton, absorption and translocation ... 116
Bottom sediment, aquatic plants, and water, effects of fertilization on ... 482
Bottom-land hardwoods, injection treatments for ... 566
Broadcast or banded chloramben, and tillage variables in soybeans ... 502
Broadleaf dock and curly dock, growth and development of ... 64
Bromacil and picloram, antagonistic effects with oats ... 440

PAGE

Bromoxynil, chloroxynil, and 2,4-DB, for establishing alfalfa and medium red clover ... 140
Brush control, evaluation of polymerized herbicides for ... 332
Buried weed seeds, phytochrome controlled changes in dormancy and germination of ... 417
Butyl ester and dimethylamine salt of 2,4-D, droplet and vapor drift ... 320

C

Cabbage and tomato roots, effects of weeds on the anatomy of ... 33
Canada thistle ecotypes, effects of environment and herbicide on ... 163
Canada thistle, effects of light quantities and glucose on 2,4-D toxicity ... 384
Canada thistle, stomata variations and response to herbicides ... 68
Carbohydrate reserves in mugwort rhizomes, influence of fenac on ... 445
Carbohydrate reserves, in roots of dalmatian toadflax ... 212
Castorbean, herbicidal control of ... 338
Cell culture and leaf buds, herbicidal concentrations of picloram in ... 185
Chemical and biological degradation, of atrazine in three Oregon soils ... 344
Chemical and physical treatments, weed seed germination responses to ... 150
Chlorophyll retention in corn leaf discs, effects of atrazine on ... 86
Chloro *s*-triazine herbicides, metabolism by *Panicum* and *Setaria* ... 584
Chloroxuron and 2,4-DB, for cocklebur control in soybeans ... 489
Chloroxuron and dinoseb applied topically, soybean and weed response to ... 511
Chloroxuron postemergence and preemergence herbicides, on soybeans ... 548
Chloroxynil, bromoxynil, and 2,4-DB, for establishing alfalfa and medium red clover ... 140
Chlorpropham, inhibitor of microbial enzyme prolongs dodder control with ... 465
Chlorpropham toxicity to safflower and common buckwheat, effect of two methylcarbamates on ... 183
Chromatin activity in corn and soybean, action of trifluralin on ... 364
Chromatin activity in corn and soybean, effect of atrazine on ... 367
Climatic conditions, effect on phytotoxicity of terbutryn ... 60
Close-drilled soybeans, weed control for ... 16
CO_2 for nuisance blooms of algae, sources of ... 492
Coastal plain, systems of weed control for soybeans in ... 592
Cocklebur and johnsongrass, competition with six soybean varieties ... 56
Cocklebur and soybean, absorption and translocation of 2,4-DB in ... 120
Cocklebur control in soybeans, with 2,4-DB and chloroxuron ... 489
Combination of DMSO and surfactant, effect on tissue concentrations of picloram ... 298
Common buckwheat and safflower, effect of two methylcarbamates on chlorpropham toxicity to ... 183
Common milkweed and other species, germination and seedling development of ... 371
Common purslane growth, as influencing control and importance as a weed ... 20
Competition and control in cotton, of prickly sida ... 137
Competition of sicklepod, with soybeans ... 379
Competitiveness and herbicide tolerance, of sorghum hybrids ... 314
Concentration of picloram, in runoff water ... 309
Concentration of picloram, in the soil profile ... 305
Continued use of herbicides in asparagus, effects of ... 428
Continuous corn grown without tillage, control and ecology of weeds in ... 453
Control and competition in cotton, of prickly sida ... 137
Control and ecology of weeds, in continuous corn grown without tillage ... 453
Control and growth, of hemp dogbane ... 156
Control of annual bluegrass in turf, role of endothall in ... 562
Control, of green foxtail in wheat with trifluralin ... 23
Control of johnsongrass, with flooding ... 238

PAGE

Control, of yaupon and associated species ... 246
Control of yellow nutsedge, in soybeans ... 194
Copper, effect on uptake of diquat-^{14}C by hydrilla ... 581
Corn and soybean, action of trifluralin on chromatin activity in ... 364
Corn and soybean, effect of atrazine on chromatin activity in ... 367
Corn grown without tillage, control and ecology of weeds in ... 453
Corn leaf discs, effects of atrazine on chlorophyll retention in ... 86
Cotton, absorption and translocation of bioxone in ... 116
Cotton and nutsedge, relative phytotoxicity of herbicides to ... 71
Cotton oil quality, after postemergence herbicides in oil ... 241
Cotton, prickly sida control and competition in ... 137
Cucumber seedlings, fate of fluorodifen in ... 255
Curly dock and broadleaf dock, growth and development of ... 64

D

2,4-D and EPTC antagonism, RNA synthesis as the basis for ... 8
2,4-D and EPTC, interaction on excised tissue growth ... 4
2,4-D, dicamba, and picloram, response of kochia selections to ... 458
2,4-D, droplet and vapor drift ... 320
2,4-D ester, in organs of three fish species ... 101
2,4-D, Geyer larkspur phenology and response to ... 31
2,4-D on tobacco leaves, ultrastructural study on the effects of ... 478
2,4-D phytotoxicity, effect of pretreatment environment on ... 540
2,4-D toxicity to Canada thistle, effects of light quantities and glucose on ... 384
2,4-D transport and accumulation, lipid influence on ... 46
2,4-DB, absorption and translocation in soybean and cocklebur ... 120
2,4-DB and chloroxuron, for cocklebur control in soybeans ... 489
2,4-DB, bromoxynil, and chloroxynil, for establishing alfalfa and medium red clover ... 140
2,4-DB, effect on white clover seed production ... 330
Daily and seasonal response, of huisache and macartney rose to herbicides ... 577
Dalmatian toadflax, carbohydrate reserves in roots of ... 212
DCPA, effect on ultrastructure of foxtail millet cells ... 220
DCPA, effects on tomato hypocotyl tissue ... 434
Desorption and adsorption, of picloram, trifluralin, and paraquat by exchange resins ... 250
Desert cropland, persistence of herbicides in ... 573
Developing countries, role of weed science in ... 408
Development and growth, curly dock and broadleaf dock ... 64
Development, of johnsongrass ... 271
Development, of range grass seedlings germinated in picloram ... 341
Development of range grass seedlings, influence of dicamba on ... 414
Dicamba, influence on development of range grass seedlings ... 414
Dicamba, picloram, and 2,4-D, response of kochia selections to ... 458
Differential response, of wild oat and barley to barban ... 74
Differential tolerance, of Hawaiian sugarcane cultivars to diuron ... 537
Dimethylamine salt and butyl ester of 2,4-D, droplet and vapor drift ... 320
Dinitroanilines, effect on solanaceous vegetables and soil fungi ... 243
Dinoseb and chloroxuron applied topically, soybean and weed response to ... 511
Diphenamid, effect of time of application on pepper, weeds, and disease ... 468
Diquat-^{14}C uptake by hydrilla, effect of copper on ... 581
Disease, pepper, and weeds, effect of time of application of diphenamid on ... 468
Diuron, differential tolerance of Hawaiian sugarcane cultivars to ... 537
Diuron-induced phytotoxicity, a proposed mechanism for ... 357
DMSO and surfactant combination, effect on tissue concentrations of picloram ... 298
DMSO, surfactant, and ^{14}C-labeled herbicides, tracer studies with ... 81
Dodder control with chlorpropham, prolonged by inhibitor of microbial enzyme ... 465
Dormancy and germination of buried weed seeds, phytochrome controlled changes in ... 417
Droplet and vapor drift, from butyl ester and dimethylamine salt of 2,4-D ... 320
Droplet size and phytotoxicity, of herbicides ... 450

E

Ecology of weeds, in continuous corn grown without tillage ... 453
Ecotypes of Canada thistle, effects of environment and herbicide on ... 163
Edaphic factors, affecting the activity of terbutryn ... 28
Efficiency, of a tractor-mounted field sprayer ... 317

PAGE

Emergence and seedling growth of soybeans, influence of herbicides on ... 506
Endothall on turf, selectivity of ... 557
Endothall, role in control of annual bluegrass in turf ... 562
Environment and herbicide, effects on Canada thistle ecotypes ... 163
Environment, pretreatment effect on 2,4-D phytotoxicity ... 540
Enzymatic hydrolysis, of herbicides in plants ... 303
EPTC amd 2,4-D antagonism, RNA synthesis as the basis for ... 8
EPTC and 2,4-D, interaction on excised tissue growth ... 4
Established johnsongrass, seasonal development of ... 392
Establishing alfalfa and medium red clover, with bromoxynil, chloroxynil, and 2,4-DB ... 140
Establishment of annual rangeland weeds, microsite requirements for ... 350
Ester of 2,4-D in organs of three fish species, dynamics of ... 101
Exchange resins, adsorption and desorption of picloram, trifluralin, and paraquat by ... 250

F

Factors, edaphic, affecting the activity of terbutryn ... 28
Fall panicum and Texas panicum, tolerance to flooding ... 1
Fallow desert cropland, persistence of herbicides in ... 573
Fate of fluorodifen, in susceptible cucumber seedlings ... 255
Fenac, influence on anatomy and carbohydrate reserves in mugwort rhizomes ... 445
Fertilization, effects on aquatic plants, water, and bottom sediment ... 482
Field and laboratory, antibiotic effects of plants in ... 189
Field sprayer, efficiency of ... 317
Fish species, 2,4-D ester in organs of ... 101
Flax and barley, trifluralin for green foxtail control in ... 160
Flooding, for johnsongrass control ... 238
Flooding tolerance, of fall panicum and Texas panicum ... 1
Fluorodifen, fate in susceptible cucumber seedlings ... 255
Foliarly-applied atrazine, uptake and translocation of ... 36
Foxtail barley, inheritance of siduron tolerance in ... 167
Foxtail, green, control in wheat with trifluralin ... 23
Foxtail millet cells, effect of DCPA on ultrastructure of ... 220

G

Germination and dormancy of buried weed seeds, phytochrome controlled changes in ... 417
Germination and persistence, achenes of Scotch thistle ... 98
Germination and production of johnsongrass rhizomes, factors affecting ... 41
Germination and seedling development, common milkweed and other species ... 371
Germination and seedling development, of yellow nutsedge tubers ... 93
Germination of weed seed, hormonal control of ... 209
Germination of weed seeds, responses to chemical and physical treatments ... 150
Geyer larkspur, phenology and response to 2,4-D ... 31
Giant foxtail, effect of shade on ... 588
Glucose and light quantities, effects on 2,4-D toxicity to Canada thistle ... 384
Government decisions and attitude on pest control, the impact of ... 405
Green foxtail control, in barley and flax with trifluralin ... 160
Green foxtail, control in wheat with trifluralin ... 23
Green foxtail, factors affecting herbicidal activity of TCA on ... 172
Growth and control, of hemp dogbane ... 156
Growth and development, curly dock and broadleaf dock ... 64
Growth of common purslane, as influencing control and importance as a weed ... 20
Growth of excised tissue, interaction of EPTC and 2,4-D on ... 4
Growth regulator-like activity, of atrazine and ametryne ... 274
Growth regulators and herbicides, a laboratory spray cabinet for ... 170

H

Hardwoods, injection treatment for ... 566
Hemp dogbane, growth and control of ... 156
Herbicidal activities, of 3-phenoxypyridazine derivatives ... 327
Herbicidal activity, in close-spaced pickling cucumbers ... 545
Herbicidal activity of TCA, on green foxtail ... 172
Herbicidal control, of volunteer castorbean ... 338
Herbicide absorption by soybean seeds, and influence on emergence and seedling growth ... 506
Herbicide and environment, effects on Canada thistle ecotypes ... 163

SUBJECT INDEX, VOLUME 20

PAGE

Herbicide and mechanical weed control, response of peach trees to ... 133
Herbicide applications in orchards, plant cover changes following ... 124
Herbicide concentrations, in honey mesquite phloem ... 264
Herbicide phytotoxicity, to a penncross bentgrass green ... 387
Herbicide selectivity, factors affecting use of activated carbon on ... 180
Herbicide tolerance and competitiveness, of sorghum hybrids ... 314
Herbicides and growth regulators, a laboratory spray cabinet for ... 170
Herbicides and weed competition, tolerance of soybean cultivars to ... 294
Herbicides, auxin-like, nucleic acid and protein changes induced by ... 53
Herbicides, daily and seasonal response of macartney rose and huisache to ... 577
Herbicides, droplet size and phytotoxicity of ... 450
Herbicides, effect on alfalfa and subsequent crops ... 335
Herbicides in asparagus, effects of continued use ... 428
Herbicides in oil, effects on cotton oil quality ... 241
Herbicides in plants, enzymatic hydrolysis of ... 303
Herbicides in red raspberry plantings, effect of repeated applications ... 432
Herbicides in soil, radioassay of ^{14}C-labeled herbicides by liquid scintillation ... 215
Herbicides, low-volume application of ... 176
Herbicides, persistence in fallow desert cropland ... 573
Herbicides, polymerized forms for brush control ... 332
Herbicides, relative phytotoxicity to cotton and nutsedge ... 71
Herbicides, response of Canada thistle to ... 68
Herbicides, tracer studies with DMSO and surfactant ... 81
Herbicides, woollyleaf bursage response to ... 554
Honey mesquite phloem, herbicide concentrations in ... 264
Hormonal aspects of seed dormancy, in yellow foxtail ... 472
Hormonal control, of weed seed germination ... 209
Huisache and macartney rose, daily and seasonal response to herbicides ... 577
Hydrilla, effect of copper on uptake of diquat-^{14}C by ... 581
Hydrolysis, of herbicides in plants ... 303
Hypocotyl tissue, effects of DCPA on ... 434

I

Influence of dicamba, on development of range grass seedlings ... 414
Inheritance, of siduron tolerance in foxtail barley ... 167
Inhibitor of microbial enzyme, in dodder control with chlorpropham ... 465
Injection treatments, for killing bottom-land hardwoods ... 566
Interaction, of EPTC and 2,4-D on excised tissue growth ... 4
Interaction, prometryne and phorate on bean ... 89
Ionic and nonionic exchange resins, adsorption and desorption of picloram, trifluralin, and paraquat by ... 250
Iron, sugars, and phosphorus, in purple nutsedge ... 348

J

Johnsongrass and cocklebur, competition with six soybean varieties ... 56
Johnsongrass, control with flooding ... 238
Johnsongrass, early development of ... 271
Johnsongrass rhizome production and germination, factors affecting ... 41
Johnsongrass, seasonal development of ... 392

K

Kansas soils, persistence and movement of picloram in ... 110
Kochia flowering, light period, and temperature ... 462
Kochia selections, response to 2,4-D, dicamba, and picloram ... 458

L

Laboratory and field, antibiotic effects of plants in ... 189
Laboratory spray cabinet, for herbicides and growth regulators ... 170
Larkspur, Geyer, phenology and response to 2,4-D ... 31
Leaching, of trifluralin and oryzalin in soil with three surfactants ... 230
Leaf buds and cell culture, herbicidal concentrations of picloram in ... 185
Leaf discs, corn, effects of atrazine on chlorophyll retention in ... 86
Leaf removal interval effect, after sprays to woody plants ... 498
Light period, temperature, and kochia flowering ... 462
Light quantities and glucose, effects on 2,4-D toxicity to Canada thistle ... 384

PAGE

Lipid, contribution to selective action of trifluralin ... 290
Lipid, influence on 2,4-D transport and accumulation ... 46
Liquid scintillation radioassay, of ^{14}C-labeled herbicides in soil ... 215
Low-volume application, of preemergence herbicides ... 176
Low-volume application, of propazine and atrazine to sorghum ... 12

M

Macartney rose and huisache, daily and seasonal response to herbicides ... 577
Mechanical weed control and herbicide, response of peach trees to ... 133
Mechanism, proposed for diuron-induced phytotoxicity ... 357
Medium red clover and alfalfa, bromoxynil, chloroxynil, and 2,4-DB for establishing ... 140
Metabolism of chloro *s*-triazine herbicides, by *Panicum* and *Setaria* ... 584
Metabolism, of simazine and atrazine by wild cane ... 153
Methazole and trifluralin absorption and translocation in peanuts, temperature effects on ... 285
Methylcarbamates, effect on chlorpropham toxicity to safflower and common buckwheat ... 183
Microbial enzyme inhibitor, in dodder control with chlorpropham ... 465
Microsite requirements, establishment of annual rangeland weeds ... 350
Mitosis, effect of trifluralin on ... 267
Movement and persistence, of picloram in soil ... 486
Movement and persistence, of picloram in two Kansas soils ... 110
Mugwort rhizomes, influence of fenac on anatomy and carbohydrate reserves in ... 445

N

Nitrate absorption induced by simazine, relation to plant protein content ... 569
Nonionic and ionic exchange resins, adsorption and desorption of picloram, trifluralin, and paraquat by ... 250
Nucleic acid and protein, changes induced by auxin-like herbicides ... 53
Nuisance blooms of algae, sources of CO_2 for ... 492
Nutrient removal, by waterhyacinth ... 423
Nutsedge, an oil carrier for increasing control ... 324
Nutsedge and cotton, relative phytotoxicity of herbicides to ... 71
Nutsedge control, in soybeans ... 194

O

Oats, antagonists effects between picloram and bromacil on ... 440
Oil carrier, for increasing purple nutsedge control ... 324
Orchards, plant cover changes following herbicide applications ... 124
Oregon soils, biological and chemical degradation of atrazine in ... 344
Oryzalin and trifluralin, leaching in soil with three surfactants ... 230

P

Panicum and *Setaria*, metabolism of chloro *s*-triazine herbicides by ... 584
Paraquat, picloram, and trifluralin, adsorption and desorption by ionic and nonionic exchange resins ... 250
Peach trees, response to herbicide and mechanical weed control ... 133
Peanuts, temperature effects on absorption and translocation of trifluralin and methazole in ... 285
Penncross bentgrass, phytotoxicity of herbicides to ... 387
Pepper, weeds, and disease, effect of time of application of diphenamid on ... 468
Persistence and germination, achenes of Scotch thistle ... 98
Persistence and movement, of picloram in two Kansas soils ... 110
Persistence and movement, picloram in soil ... 486
Persistence of herbicides, in fallow desert cropland ... 573
Pest control, impact of government decisions and attitude on ... 405
Phenology of Geyer larkspur, and response to 2,4-D ... 31
Phenoxy herbicides, influence on picloram uptake and phytotoxicity ... 226
3-Phenoxypyridazine derivatives, preemergence herbicidal activities of ... 327
Phloem of honey mesquite, herbicide concentrations in ... 264
Phorate and prometryne on bean, interaction of ... 89
Phosphorus, iron, and sugars, in purple nutsedge ... 348
Physical and chemical treatments, weed seed germination responses to ... 150
Phytochrome controlled changes, in dormancy and germination of buried weed seeds ... 417

PAGE

Phytotoxicity and droplet size, of herbicides ... 450
Phytotoxicity and uptake of picloram, influence of phenoxy herbicides on ... 226
Phytotoxicity of diuron, a proposed mechanism for ... 357
Phytotoxicity of herbicides, to a penncross bentgrass green ... 387
Phytotoxicity of herbicides to cotton and nutsedge ... 71
Phytotoxicity of terbutryn, effect of climatic conditions on ... 60
Phytotoxicity of trifluralin vapors from soil ... 143
Pickling cucumbers, herbicidal activity in ... 545
Picloram and bromacil, antagonistic effects with oats ... 440
Picloram, 2,4-D, and dicamba, response of kochia selections to ... 458
Picloram, development of range grass seedlings germinated in ... 341
Picloram, effect of DMSO and surfactant combination on tissue concentrations of ... 298
Picloram, herbicidal concentrations in cell culture and leaf buds ... 185
Picloram in runoff water, concentration of ... 309
Picloram in soil, movement and persistence of ... 486
Picloram in the soil profile, concentration of ... 305
Picloram in two Kansas soils, persistence and movement ... 110
Picloram, trifluralin, and paraquat, adsorption and desorption by ionic and nonionic exchange resins ... 250
Picloram uptake and phytotoxicity, influence of phenoxy herbicides on ... 226
Plant cover changes, following herbicide applications in orchards ... 124
Plant protein content, relation to simazine induced nitrate absorption ... 569
Plants in laboratory and field, antibiotic effects of ... 189
Polymerized herbicides, for brush control ... 332
Postemergence chloroxuron and preemergence herbicides, on soybeans ... 548
Postemergence herbicides in oil, effects on cotton oil quality ... 241
Preemergence herbicidal activities, of 3-phenoxypyridazine derivatives ... 327
Preemergence herbicides, low-volume application of ... 176
Preemergence herbicides plus postemergence chloroxuron, on soybeans ... 548
Pretreatment environment, effect on 2,4-D phytotoxicity ... 540
Prickly sida, control and competition in cotton ... 137
Production and germination of johnsongrass rhizomes, factors affecting ... 41
Prometryne and phorate on bean, interaction of ... 89
Propazine and atrazine, low-volume application to sorghum ... 12
Protein and nucleic acid, changes induced by auxin-like herbicides ... 53
Purple nutsedge, an oil carrier for increasing control ... 324
Purple nutsedge, sugars, phosphorus, and iron in ... 348
Purslane, common, growth as influencing control and importance as a weed ... 20

Q

Quality of cotton oil, after postemergence herbicides in oil ... 241

R

Radioassay, of ^{14}C-labeled herbicides in soil by liquid scintillation ... 215
Range grass seedling, influence of dicamba on ... 414
Range grass seedlings, germination in picloram ... 341
Rangeland weeds, microsite requirements for establishment ... 350
Raspberry plantings, effect of repeated annual applications of herbicides in ... 432
Reserves in roots, carbohydrate in dalmatian toadflax ... 212
Response of kochia selections, to 2,4-D, dicamba, and picloram ... 458
Response of peach trees, to herbicide and mechanical weed control ... 133
Response to selected herbicides, woollyleaf bursage ... 554
Rhizome production and germination of johnsongrass, factors affecting ... 41
Rhizomes, influence of fenac on anatomy and carbohydrate reserves of ... 445
RNA synthesis, as the basis for EPTC and 2,4-D antagonism ... 8
Role of weed science, in developing countries ... 408
Roots of cabbage and tomato, effects of weeds on the anatomy of ... 33
Runoff water, concentration of picloram in ... 309

S

Safflower and common buckwheat, effect of two methylcarbamates on chlorpropham toxicity to ... 183
Scotch thistle, germination and persistence of achenes ... 98
Seasonal and daily response, of huisache and macartney rose to herbicides ... 577
Seasonal development, of established johnsongrass ... 392
Seed dormancy in yellow foxtail, hormonal aspects of ... 472
Seed production of white clover, effect of 2,4-DB on ... 330
Seedling development and germination, common milkweed and other species ... 371
Seedling development and tuber germination, yellow nutsedge ... 93
Seedling growth and emergence of soybeans, influence of herbicides on ... 506
Selective action of trifluralin, lipid contribution to ... 290
Selectivity of endothall, in turf ... 557
Selectivity of herbicides, factors affecting use of activated carbon on ... 180
Setaria and *Panicum*, metabolism of chloro *s*-triazine herbicides by ... 584
Shade, effect on giant foxtail ... 588
Sicklepod with soybeans, competition of ... 379
Siduron tolerance in foxtail barley, inheritance of ... 167
Simazine and atrazine, metabolism by wild cane ... 153
Simazine-induced nitrate absorption, relation to plant protein content ... 569
Soil fungi and solanaceous vegetables, effect of dinitroanilines on ... 243
Soil, leaching of trifluralin and oryzalin in ... 230
Soil, liquid scintillation radioassay of ^{14}C-labeled herbicides in ... 215
Soil, movement and persistence of picloram in ... 486
Soil, phytotoxicity of trifluralin vapors from ... 143
Soil profile, concentration of picloram in ... 305
Soil, trifluralin vapor emission from ... 147
Solanaceous vegetables and soil fungi, effect of dinitroanilines on ... 243
Sorghum hybrids, competitiveness and tolerance to herbicide ... 314
Sorghum, low-volume application of propazine and atrazine to ... 12
Sorghum, preplant atrazine applications on ... 49
Soybean and cocklebur, absorption and translocation of 2,4-DB in ... 120
Soybean and corn, action of trifluralin on chromatin activity in ... 364
Soybean and corn, effect of atrazine on chromatin activity in ... 367
Soybean, competition of johnsongrass and cocklebur with six varieties of ... 56
Soybean cultivars, tolerance to weed competition and herbicides ... 294
Soybean seeds, absorption of herbicides and their influence on emergence and seedling growth ... 506
Soybeans and weed response, to dinoseb and chloroxuron applied topically ... 511
Soybeans, broadcast or banded chloramben with tillage variables in ... 502
Soybeans, close drilled, weed control for ... 16
Soybeans, cocklebur control with 2,4-DB and chloroxuron in ... 489
Soybeans in the coastal plain, systems of weed control for ... 592
Soybeans, preemergence herbicides plus postemergence chloroxuron on ... 548
Soybeans with sicklepod, competition of ... 379
Soybeans, yellow nutsedge control in ... 194
Sprayer, efficiency of ... 317
Stomata variations in Canada thistle, and response to herbicides ... 68
Subsequent crops and alfalfa, effect of herbicides on ... 335
Sugarcane cultivars, differential tolerance to diuron ... 537
Sugars, phosphorus, and iron, in purple nutsedge ... 348
Sunflowers, weed control systems for ... 261
Surfactant and DMSO combination, effect on tissue concentrations of picloram ... 298
Surfactant, DMSO, and ^{14}C-labeled herbicides, tracer studies with ... 81
Surfactants, leaching of trifluralin and oryzalin in soil with ... 230
Systems of weed control, for soybeans in the coastal plain ... 592
Systems of weed control, for sunflowers ... 261

T

TCA herbicidal activity, on green foxtail ... 172
Temperature effects, on absorption and translocation of trifluralin and methazole in peanuts ... 285
Temperature, light period, and kochia flowering ... 462
Terbutryn, edaphic factors affecting the activity of ... 28
Terbutryn, effect of climatic conditions on phytotoxicity of ... 60

SUBJECT INDEX, VOLUME 20

PAGE

Texas panicum and fall panicum, tolerance to flooding 1
Tillage variables in soybeans, with broadcast or banded chloramben 503
Time of application of diphenamid, effect on pepper, weeds, and disease 468
Tissue concentrations of picloram, effect of DMSO and surfactant combination 298
Tobacco leaves, ultrastructural study on the effects of 2,4-D on 478
Tolerance, of Hawaiian sugarcane cultivars to diuron 537
Tolerance of sorghum hybrids, to herbicides 314
Tolerance of soybean cultivars, to weed competition and herbicides 294
Tolerance to flooding, of fall panicum and Texas panicum 1
Tolerance to siduron, inheritance in foxtail barley 167
Tomato and cabbage roots, effects of weeds on the anatomy of 33
Tomato hypocotyl tissue, effects of DCPA on 434
Toxicity of chlorpropham to safflower and common buckwheat, effect of two methylcarbamates on 183
Tracer studies, with ^{14}C-labeled herbicides, DMSO, and surfactant 81
Tractor-mounted field sprayer, efficiency of 317
Translocation and absorption, bioxone in cotton 116
Translocation and absorption, 2,4-DB in soybean and cocklebur 120
Translocation and absorption of trifluralin and methazole in peanuts, temperature effects on 285
Translocation and uptake, foliarly-applied atrazine 36
Transport and accumulation of 2,4-D, lipid influence on 46
Triazine herbicides, metabolism by *Panicum* and *Setaria* 584
Trifluralin action, on chromatin activity in corn and soybean 364
Trifluralin and methazole absorption and translocation in peanuts, temperature effects on 285
Trifluralin and oryzalin, leaching in soil with three surfactants 230
Trifluralin, control of green foxtail in wheat with 23
Trifluralin, effect on mitosis 267
Trifluralin, for green foxtail control in barley and flax 160
Trifluralin, lipid contribution to selective action of 290
Trifluralin, picloram, and paraquat, adsorption and desorption by ionic and nonionic exchange resins 250
Trifluralin vapor, emission from soil 147
Trifluralin vapors from soil, phytotoxicity of 143
Tuber germination and seedling development, yellow nutsedge 93
Turf, role of endothall in the control of annual bluegrass in 562
Turf, selectivity of endothall in 557

U

Ultrastructural study, of effects of 2,4-D on tobacco leaves 478
Ultrastructure of foxtail millet cells, effect of DCPA on 220
Uptake and phytotoxicity of picloram, influence of phenoxy herbicides on 226
Uptake and translocation, foliarly-applied atrazine 36
Uptake of diquat-^{14}C by hydrilla, effect of copper on 581

V

Vapor and droplet drift, from butyl ester and dimethylamine salt of 2,4-D 320
Vapor emission, trifluralin from soil 147
Vegetables and soil fungi, effect of dinitroanilines on 243
Volunteer castorbean, herbicidal control of 338

W

Water, bottom sediment, and aquatic plants, effects of fertilization on 482
Waterhyacinth, nutrient removal by 423
Weed and soybean response, to dinoseb and chloroxuron applied topically 511
Weed competition and herbicides, tolerance of soybean cultivars to 294
Weed control, aquatic, with white amur 106
Weed control, for close-drilled soybeans 16
Weed control for soybeans, control systems in the coastal plain 592
Weed control, mechanical, response of peach trees to 133
Weed control systems, for sunflowers 261
Weed science, in perspective 401
Weed science, role in developing countries 408
Weed seed germination, hormonal control of 209
Weed seed germination, responses to chemical and physical treatments 150
Weeds, disease, and pepper, effect of time of application of diphenamid on 468
Weeds, effects on the anatomy of roots of cabbage and tomato 33
Wheat, control of green foxtail with trifluralin in 23
White amur, for aquatic weed control 106
White clover seed production, effect of 2,4-DB on 330
Wild cane, metabolism of simazine and atrazine by 153
Wild garlic bulb anatomy, during and subsequent to after ripening 233
Wild oat and barley, differential response to barban 74
Woody plants, leaf removal interval effect after sprays to 498
Woollyleaf bursage, response to selected herbicides 554

XYZ

Yaupon and associated species, control of 246
Yellow foxtail, hormonal aspects of seed dormancy in 472
Yellow nutsedge, control in soybeans 194
Yellow nutsedge tuber, germination and seedling development 93
